JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Accumulated particulate matter
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171
Additive effect
Production of harmful materials from synthetic polymers under pyrolysis, 7
Almond shells
Comparison between the pyrolysis products obtained from different organic wastes at high temperatures, 41
Analysis
Headspace gas chromatography analysis of uncombusted gasoline diluent in used gasoline engine oils, 233
Analytical pyrolysis
Analytical pyrolysis — past, present and future, 1
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Artificial neural network
Rapid detection of Verocytotoxin production status in *Escherichia coli* by artificial neural network analysis of pyrolysis–mass spectra, 179
Asbestos
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171
Aspartame
Thermal decomposition products of aspartame as determined by pyrolysis–gas chromatography/mass spectrometry, 137
Azirines
Azirines from the flash vacuum pyrolysis of oximes, 161

Biological substances
Determination of sulfur in biologically important substances by pyrolysis–gas chromatography, 127
Bone marrow
Analysis of bone marrow from patients with acute leukemia by high resoution pyrolysis–gas chromatography, 187

Carbonaceous chondrite
Characterization of extraterrestrial high-molecular-weight organic matter by pyrolysis–gas chromatography/mass spectrometry, 65
Catalysts
Metal-catalyzed two-stage pyrolysis. 2. Role of different catalysts in the production and composition of ethylene/propylene-enriched gases, 213
Upgrading heavy ends into marketable products. New concepts and new catalysts for two-stage catalytic pyrolysis, 221
Chlorophyll-a
Application of pyrolysis–gas chromatography to the study of thermal alteration of chlorophyll-a — effect of clay minerals, 153
Classification
Classification of hashish by pyrolysis–gas chromatography, 197
Clay minerals
Application of pyrolysis–gas chromatography to the study of thermal alteration of chlorophyll-a — effect of clay minerals, 153
Cluster analysis
Classification of hashish by pyrolysis–gas chromatography, 197
Coals
Flash pyrolysis of coals. Temperature-dependent product distribution, 51

0165-2370/95/$09.50 © 1995 – Elsevier Science B.V. All rights reserved

Computer-assisted design
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Copper
Metal-catalyzed two-stage pyrolysis. 2. Role of different catalysts in the production and composition of ethylene/propylene-enriched gases, 213
Curie-point pyrolysis
Characterization of extraterrestrial high-molecular-weight organic matter by pyrolysis–gas chromatography/mass spectrometry, 65
Determination of sulfur in biologically important substances by pyrolysis–gas chromatography, 127

Decomposition
Comparison between the pyrolysis products obtained from different organic wastes at high temperatures, 41
Direct pyrolysis–mass spectrometry
Composition, stability and turnover of soil organic matter: investigations by off-line pyrolysis and direct pyrolysis–mass spectrometry, 91

Egyptian crude oil
Upgrading heavy ends into marketable products. New concepts and new catalysts for two-stage catalytic pyrolysis, 221
Escherichia coli
Rapid detection of Verocytotoxin production status in *Escherichia coli* by artificial neural network analysis of pyrolysis–mass spectra, 179
Extraterrestrial organic matter
Characterization of extraterrestrial high-molecular-weight organic matter by pyrolysis–gas chromatography/mass spectrometry, 65

Flame photometric detector
Determination of sulfur in biologically important substances by pyrolysis–gas chromatography, 127
Flash pyrolysis–gas chromatography
Application of pyrolysis–gas chromatography to the study of thermal alteration of chlorophyll-a — effect of clay minerals, 153
Flash vacuum pyrolysis
Azirines from the flash vacuum pyrolysis of oximes, 161

Gas chromatography
Analysis of bone marrow from patients with acute leukemia by high resolution pyrolysis–gas chromatography, 187
Determination of sulfur in biologically important substances by pyrolysis–gas chromatography, 127
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171
Production of harmful materials from synthetic polymers under pyrolysis, 7
Gasoline diluent
Headspace gas chromatography analysis of uncombusted gasoline diluent in used gasoline engine oils, 233
Geometry optimization
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111

Hashish
Classification of hashish by pyrolysis–gas chromatography, 197
Headspace GC
Headspace gas chromatography analysis of uncombusted gasoline diluent in used gasoline engine oils, 233
Heavy distillate
Upgrading heavy ends into marketable products. New concepts and new catalysts for two-stage catalytic pyrolysis, 221
Heterogeneous materials
Kinetic models for the thermal degradation of heterogeneous materials, 29
High-molecular-weight organic matter
Characterization of extraterrestrial high-molecular-weight organic matter pyrolysis–gas chromatography/mass spectrometry, 65
Human hair
Determination of sulfur in biologically important substances by pyrolysis–gas chromatography, 127

Iminyl radical
Azirines from the flash vacuum pyrolysis of oximes, 161
Isoprenoid hydrocarbons
Application of pyrolysis–gas chromatography to the study of thermal alteration of chlorophyll-a — effect of clay minerals, 153

Isoxazoles
Azirines from the flash vacuum pyrolysis of oximes, 161

Kinetic models
Kinetic models for the thermal degradation of heterogeneous materials, 29

Leukemia
Analysis of bone marrow from patients with acute leukemia by high resoution pyrolysis–gas chromatography, 187
Lignin
Comparison between the pyrolysis products obtained from different organic wastes at high temperatures, 41

Mass spectrometry
Production of harmful materials from synthetic polymers under pyrolysis, 7
Mixed plastics
Olefins from polyolefins and mixed plastics by pyrolysis, 19
Molecular modeling
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Morphine alkaloids
Determination of the total amount of morphine alkaloids in opium by pyrolysis–gas chromatography using principal component analysis, 205
Municipal solid waste
Comparison between the pyrolysis products obtained from different organic wastes at high temperatures, 41

Nanochemistry
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Nickel
Metal-catalyzed two-stage pyrolysis. 2. Role of different catalysts in the production and composition of ethylene/propylene-enriched gases, 213

Off-line pyrolysis
Composition, stability and turnover of soil organic matter: investigations by off-line pyrolysis and direct pyrolysis–mass spectrometry, 91
Olefins
Olefins from polyolefins and mixed plastics by pyrolysis, 19
Opium
Determination of the total amount of morphine alkaloids in opium by pyrolysis–gas chromatography using principal component analysis, 205
Organic matter
Characterization of sinking particles in the ocean by pyrolysis–gas chromatography/mass spectrometry, 75
Organo-mineral complexes
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Oxazoles
Azirines from the flash vacuum pyrolysis of oximes, 161
Oximes
Azirines from the flash vacuum pyrolysis of oximes, 161

Phenolic resin
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171
Poly(chlorostyrene)
Production of harmful materials from synthetic polymers under pyrolysis, 7
Polyethylene
Comparison between the pyrolysis products obtained from different organic wastes at high temperatures, 41
Production of harmful materials from synthetic polymers under pyrolysis, 7
Polyolefins
Olefins from polyolefins and mixed plastics by pyrolysis, 19
Poly(vinylbenzyl chloride)
Production of harmful materials from synthetic polymers under pyrolysis, 7
Porcelain
Metal-catalyzed two-stage pyrolysis. 2. Role of different catalysts in the production and composition of ethylene/propylene-enriched gases, 213
Principal component analysis
Determination of the total amount of morphine alkaloids in opium by pyrolysis–gas chromatography using principal component analysis, 205

Product distribution
Flash pyrolysis of coals. Temperature-dependent product distribution, 51
PVC
Production of harmful materials from synthetic polymers under pyrolysis, 7
Pyrolysis–gas chromatography/mass spectrometry
Characterization of extraterrestrial high-molecular-weight organic matter by pyrolysis–gas chromatography/mass spectrometry, 65
Characterization of sinking particles in the ocean by pyrolysis–gas chromatography/mass spectrometry, 75
Thermal decomposition products of aspartame as determined by pyrolysis–gas chromatography/mass spectrometry, 137
Pyrolysis–gas chromatography
Classification of hashish by pyrolysis–gas chromatography, 197
Determination of the total amount of morphine alkaloids in opium by pyrolysis–gas chromatography using principal component analysis, 205
Pyrolysis–mass spectrometry
Rapid detection of Verocytotoxin production status in *Escherichia coli* by artificial neural network analysis of pyrolysis–mass spectra, 179

Review
Analytical pyrolysis — past, present and future, 1

Semi-empirical calculations
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Sinking particles
Characterization of sinking particles in the ocean by pyrolysis–gas chromatography/mass spectrometry, 75
Soft drinks
Thermal decomposition products of aspartame as determined by pyrolysis–gas chromatography/mass spectrometry, 137
Soil organic matter
Composition, stability and turnover of soil organic matter: investigations by off-line pyrolysis and direct pyrolysis–mass spectrometry, 91
The three-dimensional structure of soil organo-mineral complexes studied by analytical pyrolysis, 111
Sulfur
Determination of sulfur in biologically important substances by pyrolysis–gas chromatography, 127
Suspended particulate matter
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171
Sweeteners
Thermal decomposition products of aspartame as determined by pyrolysis–gas chromatography/mass spectrometry, 137

Thermal alteration
Application of pyrolysis–gas chromatography to the study of thermal alteration of chlorophyll-a — effect of clay minerals, 153
Thermal degradation
Kinetic models for the thermal degradation of heterogeneous materials, 29
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171
Traffic
Indirect estimation of asbestos concentration due to vehicles in particulate matter in the atmosphere and on roads by pyrolysis–gas chromatography, 171

Verocytotoxin production
Rapid detection of Verocytotoxin production status in *Escherichia coli* by artificial neural network analysis of pyrolysis–mass spectra, 179
